

RepManNet - The network for repository managers

Dr. Susanne Blumesberger, Vienna University Library

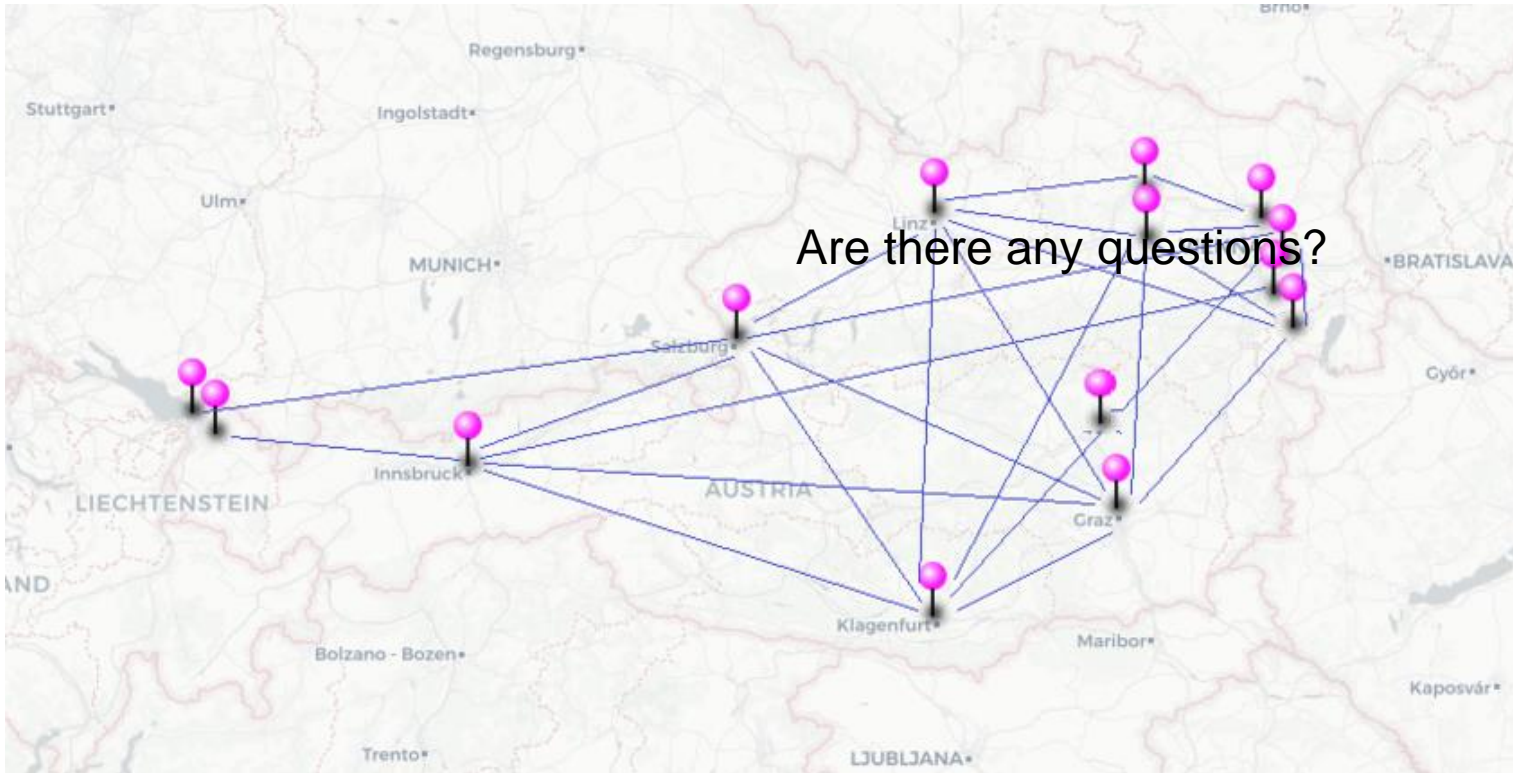

Susanne Blumesberger

Head of Department Repositorymanagement
Phaidra-Services at the Library at the University of
Vienna
Project Manager of “FAIR DATA Austria”
Coordinator of RepManNet

Who are we?

e-infrastructures austria

The starting point was the national projects e-infrastructures and e-infrastructures austria plus, which aimed to establish long-term structures for comprehensive research data management.

Life Cycle Management/Metadata/Open Access/e-accessibility/Data Management Plans...

<https://www.e-infrastructures.at/en/>

After these projects 2016

These valuable contacts should not disappear again!

What to do?

The solution!

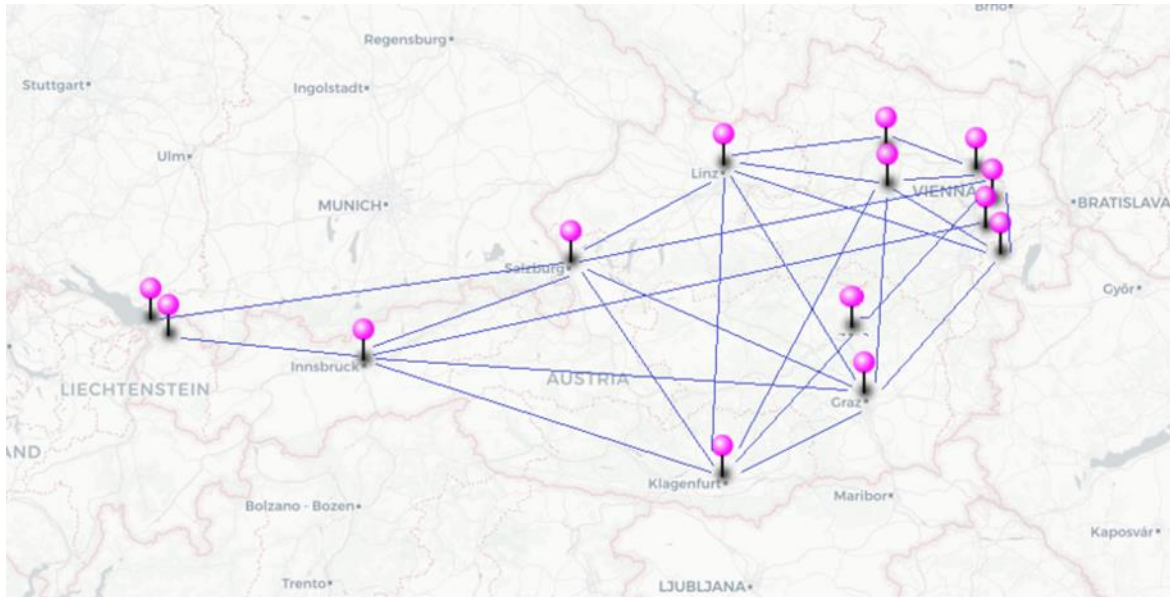

Establishment of Repmannet. A cooperation between

FORUM UNIVERSITÄTSBIBLIOTHEKEN ÖSTERREICHS

What means RepManNet?

RepManNet is a network of those members of staff of Austrian institutions who are in charge of repository management.

What are we doing?

RepManNet offers an exchange of experiences, special issues and challenges in regular meetings to prioritize key aspects of scientific digital repositories.

Lectures and workshops held by experts will consistently deepen its members' knowledge about repository management.

More than 130 people and more than 40 institutions are now members of this network.

Institutions

AK Bibliothek Wien, Albertina Bibliothek, Bibliothek der Donau-Universität Krems, Bibliothek FH Burgenland, Bibliothek FH des BFI Wien, Bibliothek FH Joanneum, Bibliothek FH St. Pölten, Bibliothek FH Vorarlberg, Bibliothek IHS Institut für höhere Studien, Bibliothek IIASA (International Institute for Applied Systems Analysis), Bibliothek IST Austria (Institute for Science and Technology), Bibliothek Österreichische Galerie Belvedere, Bibliothek und Mediathek FH Campus Wien, Bundeskanzleramt, Forschungsinstitut Brenner-Archiv Universität Innsbruck, FWF Der Wissenschaftsfonds, Karl-Franzens-Universität Graz: Zentrum für Informationsmodellierung, Karl Landsteiner Privatuniversität für Gesundheitswissenschaften Krems, Landesbibliothek Oberösterreich, Liechtensteinische Landesbibliothek, Ludwig-Maximilians-Universität München, MAK - Bibliothek und Kunstblättersammlung, OBVSG, Österreichische Akademie der Wissenschaften, Österreichische Nationalbibliothek, Universität für Musik und darstellende Kunst Wien, Universität Wien, Universitäts- und Landesbibliothek Tirol, Universitätsbibliothek Akademie der bildenden Künste Wien, Universitätsbibliothek der Anton Bruckner Privatuniversität, Universitätsbibliothek Johannes Kepler Universität Linz, Universitätsbibliothek Karl-Franzens-Universität Graz, Universitätsbibliothek Klagenfurt, Universitätsbibliothek Kunstuniversität Linz, Universitätsbibliothek Medizinische Universität Wien, Universitätsbibliothek Salzburg, Universitätsbibliothek Technische Universität Wien, Universitätsbibliothek Universität für Angewandte Kunst Wien, Universitätsbibliothek Universität für Bodenkultur Wien, Universitätsbibliothek Kunstuniversität Graz, Universitätsbibliothek Universität Mozarteum Salzburg, Universitätsbibliothek Veterinärmedizinische Universität Wien, Universitätsbibliothek Wien, Universitätsbibliothek Wirtschaftsuniversität Wien, Vorarlberger Landesbibliothek, Wienbibliothek im Rathaus

What are we working on?

Some fields of action in repository management:

- technical issues (formats, long-term archiving ...)
- Legal issues (exploitation rights, licenses, etc.)
- open access
- sensitive data
- Thesis
- data visualization
- metadata

RepManNet Working Groups

- WG Accessibility
- WG Digital Humanities
- WG DINI in Austria (Standardization)
- WG FAIR Metadata
- WG Research Data Management in Practice
- WG Open Access
- WG Repository Management Handbook (Guideline for Repository managers)
- WG Thesis
- WG Making repositories visible
- WG Certification of repositories

WG Digital Humanities

The working group will discuss methods how data management can respond to new challenges within the framework of the FAIR-Data principles and how repository managers can support the Digital Humanities.

WG FAIR Metadata

- Usability Testing
- Labeling of accessible metadata in different metadata schemas
- FAIR principles regarding metadata
- Accessibility for metadata

WG Research data management in practice

- RISE model: Reference model for the self-evaluation of an institution with regard to RDM
- Dealing with racist designations of objects and data (i.e. Cultural and social anthropology)
- Saferooms and security
- Practical legal issues in RDM

WG Accessibility

- Create awareness
- Search for documents
- Search for tests
- Create overview document: <https://doi.org/10.31263/voebm.v73i2.3640>
- Create guidelines (description of metadata fields, help texts, accessible content (pdf's, videos, audios, ...))

WG Thesis

- Answer to questions / recommendations
- Assignment of DOI - Does DOI need to be included in consent form?
- Does/should the library review thesis before release?
- Should the library black out images that may not be published online?
- Should acknowledgements be published online?

WG Creation of a handbook/practice guide for repository management

With this handbook we would like to provide as broad an overview as possible of experiences with repository management. It is intended to be a practical guide that supports daily work and answers questions from everyday life.

Wiki

 Bearbeiten  Beobachten  Sperren  Umbenennen  Löschen  Historie

What are the advantages of this network?

- stable network of interested persons
- Openness (of topics, of software used, of access)
- committed working groups
- we use the knowledge of numerous experts
- we invite additional experts from home and abroad
- we inform each other about news, events and share solutions
- we can reach each other very quickly in case of questions
